

Mark your calendars now for the must-attend peer coaching executive breakfast event.

Developing effective leaders is no easy task - and you may have discovered that many approaches do not deliver significant results, and do little to help with senior staff retention.

You are invited to discover **Peer Coaching Networks**, a recently developed and successfully piloted approach to training that leverages the following methods at almost two thirds the cost of traditional techniques:

- peer coaching
- internal mentoring
- assessment, feedback and goal setting
- action learning
- external coaching

Peer Coaching Networks enable participants to effectively develop others, and encourages commitment to the organization. They are flexible, can be conducted with intact teams, cross-functionally, cross-business unit, or with geographically dispersed groups.

To learn more, read the article by Gerry Pulvermacher in the September 2007 issue of Canadian Government Executive magazine [Click here to view article](#), and plan to attend:
